

Bricklayer Trainee

ALGOMA

Sault Ste. Marie, Ontario Canada

The Company

For over a century Algoma has a proud history and strong traditions of being an industry leading manufacturer of hot and cold rolled sheet steels in carbon and high strength low-alloy grades and we are Canada's only plate producer. We are integral to the making of many of our modern day buildings, products and appliances. Our steel is used in construction, mining, manufacturing, automotive, shipbuilding, energy resources including renewable energy and military applications throughout North America. Today's steel industry is rapidly evolving and so are we, bringing new products to market that our customers need for their success. We are inviting everyone who has a talent and drive for superior performance, a desire to be part of a team of steel industry professionals focused on transforming our company to continue our century long tradition of delivering high quality steel products to our customers, improving the quality of life for our community, demonstrating industry-leading environmental stewardship and providing rich and rewarding careers for our employees.

- Must have a minimum Ontario Secondary School Diploma (Grade 12) or equivalent, and must be willing to successfully complete the in-house Bricklayer training program.
- Successful completion of an entrance aptitude test
- Minimum 3 months experience as a Heavy Equipment Operator (HEO) in Masonry or 6 months of proven refractory, masonry, concrete application as a labourer is a must.
- Team player with excellent organizational, communication, interpersonal and leadership abilities.
- Self-starter and able to work effectively with minimal direction.
- Good analytical and problem solving/decision making abilities.
- Commitment to healthy and safe work practices and sustainable environmental practices.
- Will work in confined spaces in all departments within Algoma while performing functions of the Refractory Mason trade.
- Must not be afraid of heights and successfully complete working at heights training and man lift training within 3 months.

Applicants must provide up to date resume and proof of education, i.e. diploma and transcripts as well as related experience.

Successful candidates will progress to the above tradesperson's level to work with firebrick and other refractory materials to walls, arches and floors in the construction of furnaces or lining of furnaces and various structures throughout the Steelworks.

Graduation will require successful completion of the in-house Bricklayer Trainee program as provided by Essar Steel Algoma or other training facilities as well as comprehensive In-Field Training in various areas of the Steelworks.

If you meet the qualifications for this position and are committed to a challenging career with a dynamic company, in a community that offers superior quality of life, we encourage you to apply today.
